THE ASPEN

Our boldest expression, with two-tone cabinetry, dramatic stone, and textured tile for a home that feels straight from a design magazine. Soft white shaker perimeter cabinetry meets a deep charcoal-gray island in the kitchen, paired with Calacatta-style quartz featuring dramatic flowing gray veining, a handcrafted-look glossy white square tile backsplash with subtle dimension, and matte black fixtures and pulls throughout. Charcoal-gray cabinetry continues into the primary and secondary baths with white quartz countertops, matte black fixtures, and polished marble-look tile in the primary shower, while light oak porcelain flooring flows through the main living areas and baths, soft neutral carpet grounds the bedrooms, and cool-gray walls with white ceilings and a modern black four-panel front door complete the look.
